## **THE LINDEN ROSELLE SEWERAGE AUTHORITY – DESCRIPTION**

The Linden Roselle Sewerage Authority (“The Authority”) is a local public body created in 1948 by the City of Linden and Borough of Roselle under the “Sewerage Authorities Law” (N.J.S.A.40:14A-1 et seq.). It was established to contract and operate wastewater treatment and interceptor facilities to collect, treat and dispose of sewerage generated by the municipalities under a Municipal Agreement dated December 6, 1949 and as later amended.

The Authority operations are overseen by the six Members of the Board and day to day operations and administration are conducted by a staff headed by an Executive Director.

The Authority’s service area is 13 square miles and it services a residential population of 60,000. Approximately 19% of the influent sewerage flow is from industrial sources.

The Authority is governed by federal and state regulation. It operates its facilities and discharges treated wastewater to the Arthur Kill under permit No. 0024953 issued by the New Jersey Department of Environmental Protection (N.J.D.E.P). A portion of the effluent is permitted for beneficial reuse for cooling water for Electric power generated at an adjacent power plant.

The Authority employs 45 people in four departments: Administration, Monitoring/Environmental Compliance, Operations and Maintenance. The Authority owns administration, monitoring/laboratory, treatment facilities and various auxiliary buildings at its primary site at 5005 South Wood Ave., Linden, NJ. It also owns a dock facility at the Arthur Kill and various metering pumping stations and pipelines outside of its treatment plant site.

The Authority’s sewerage treatment is classified as a biological system and is designed to treat 17 million gallons per day. It consists of primary sedimentation, activated sludge, secondary clarifiers and ultraviolet disinfection for final effluent. Residuals (sludge) treatment is by gravity thickening of primary sludge, gravity belt thickening (for waste activated sludge). Residuals are anaerobically digested and resulting methane gas is utilized for heat or flared (incinerated). Residual sludge is concentrated with Polymer. Final residuals are removed and disposed of off-site by a private contractor. The Authority’s 2021 operating budget is approximately \$9,500,000.

In providing any aid, benefit, or service on behalf of the owner pursuant to this contract, the contractor agrees that the performance shall be in strict compliance with the Act. In the event that the contractor, its agents, servants, employees, or subcontractors violate or are alleged to have violated the Act during the performance of this contract, the contractor shall defend the owner in any action or administrative proceeding commenced pursuant to this Act.
